# OMEGA

---

## New numbering of the Omega winding crowns

The crowns are divided into four different types:

1. Crowns with grooving
2. Patent crowns
3. Hermetic crowns
4. Waterproof crowns

A four-figured number is used to denote and classify the crowns.

The first figure indicates the type of crown,

the second figure indicates the diameter of the thread and

the two last figures the order of their production.

Therefore the thread 0.80 mm is represented by the figure 1

”	”	0.90 mm	”	”	”	”	2
”	”	1.00 mm	”	”	”	”	3
”	”	1.10 mm	”	”	”	”	4
”	”	1.20 mm	”	”	”	”	5
”	”	square 0.70 mm	”	”	”	”	6 (for caliber 440)

Like this a Patent crown, the diameter of the thread of which is 1.00 mm., and 11 the number of the order of production, will bear the number 2311.

---

When making out your orders for crowns, you should refer to the tables attached hereto which include all the numbers of OMEGA crowns. It is equally indispensable to let us know the metal and the colour of the crowns you desire:

*Example: 50 crowns No. 2311, yellow goldfilled.*

For your information we set out below the different executions of the crowns utilised (metal - colour)

Steel	Yellow solid gold	}	(for cal: 540)
Yellow gold-filled	Pink solid gold		
Rose gold-filled	White solid gold		

Crowns are to be ordered on B forms.
